

Configuring Dell computers to restart after a power outage:

1. Turn on / Restart your machine
2. When you see the Dell logo hit F2 on your keyboard continuously, until you see a yellow prompt at the very top right of the screen. This will bring you into the BIOS
3. Once in the BIOS locate the "Power Management" menu and click the "+"
4. Then click on "AC Recovery"
5. Click the "Power On" radio button
6. Click on "Apply", then "Exit" and you're all set
